NOTICE

This report is provided by your golf association as an aid in the selection of the most improved golfer. There are situations that cannot be taken into account by just the formula, i.e. a golfer joined after the beginning date. The beginning Handicap Index is compared to the ending Handicap Index. The following formula is used to develop the most improved golfer report. The highest ranking is the most improved. This report lists the top 25 golfers. If you need additional rankings, contact your golf association.

$$\text{Most Improved Factor} = \frac{\text{Beginning Handicap Index} + K}{\text{Ending Handicap Index} + K}$$

K = 12 for 18-hole handicaps

K = 6 for 9-hole handicaps

The K ensures that lower handicap players have a better improvement factor than higher handicap players who improve the same number of strokes.

Most Improved Golfer WORKING WOMEN'S GOLF ASSN.
